

Gemini Baby Carrier 1.0
7-35 lbs | 3.5-16 kg

3. HIP CARRY POSITION (ONLY FOR BABIES WITH FULL HEAD/NECK CONTROL!!!) Use the WIDE BASE.

1. Attach the side wings with snaps to the waist belt to make the base WIDE .

2. Place the carrier around your hips with the seat above your hip.

3. Place baby in the carrier. Support her with your arm.

4. Pull the carrier up and over the baby. Place front shoulder strap over your shoulder.

5. Switch your arms and reach behind for the end of the shoulder strap.

6. Attach buckles on side of the carrier. Pull on straps ends to adjust them tightly around your body.

7. Run the other shoulder strap UNDER your arm as shown and place it OVER your opposite shoulder.

8. Attach buckles on side of the carrier. Pull on straps ends to adjust them tightly around your body.

9. The shoulder straps will rest onto each other over your shoulder. Pull on both straps at once and position them on your shoulder, not on your neck.

10. Final position. Note how the WIDE BASE support baby's legs. Smaller infants can also ride with their arms tucked in.

4. BACK CARRY POSITION (ONLY FOR BABIES WITH FULL HEAD/NECK CONTROL!!!) Use the WIDE BASE.

1. Attach the side wings with snaps to the waist belt to make the base WIDE .

2. CLOSE BOTH SIDE BUCKLES. DO NOT CROSS THE STRAPS. You can also choose to attach the headrest.

3. It should look like this when you are done closing buckles.

4. Place baby in the carrier. Support her with your arm.

5. Pull the carrier up and over the baby. Hold both shoulder straps in one hand. Support baby with other hand.

6. Start shifting baby and carrier around your waist as far back as possible.

7. Bend forward slightly to create more support for baby. Slip your arm through shoulder strap opening.

8. Position baby and carrier in center of your back. Slide your other arm through shoulder strap opening.

9. Close the chest (sternum) strap on your front. It should rest above your breasts and under your collar bone.

10. Final position with headrest UP.

11. Final position with headrest DOWN.

1. FRONT CARRY FACING IN POSITION (7 LBS/3.5 KG +) For newborns 7-15 lbs. From 15 lbs+ use the WIDE BASE.

1. Attach the side wings with snaps in the center to make the base **NARROW** or to the waist belt to make the base **WIDE**.

2. Place the carrier around your waist with the print toward your body.

3. Close and adjust waist belt tightly around your waist.

4. Place baby in the carrier. Support her with your arm.

5. Pull the carrier up and over the baby. Place the shoulder strap over your shoulder.

6. Switch your arms and reach behind for the end of the shoulder strap.

7. Attach buckles on side of the carrier. Pull on straps ends to adjust them tightly around your body. REPEAT STEP 6 & 7 with other shoulder strap.

8. For babies without head/neck control, attach the headrest using the Hook and D-ring on the shoulder straps.

9. Final position with headrest **UP & WIDE BASE**.

10. Final position with headrest **DOWN & NARROW BASE**.

CHANGING THE BASE WIDTH & ITS EFFECT:

The innovative feature which enables you to change the width of the baby carrier's base, makes a world of difference in the way how the baby's weight is distributed over your body. While small infants will enjoy plenty of support with **NARROW BASE**, older babies (15 lbs+) should ride with the base open **WIDE**. The wide base will support the growing baby in an ergonomically proper position with her knees as high as her buttocks. Notice fig. 9 how the baby spreads her legs wide and around the parents body. **THIS IS PROPER ERGONOMIC POSITION**. Fig. 10 shows the same baby with **NARROW** base - notice how her legs are dangling slightly down. If you get this effect with your baby, it means she outgrew the **NARROW** base and needs to start riding with the base open **WIDE**. You will also notice a major increase in comfort with the **WIDE** base for yourself. That's because the baby's weight is being distributed better.

ACHIEVING MINIMUM SIZE LEG OPENING:

Small children can fall through a leg opening. Make sure to adjust the shoulder straps tight enough so the baby does not feel too loose in the carrier. Refer to fig. 7 in **FRONT CARRY FACING IN POSITION** and fig. 7 in **FRONT CARRY FACING OUT POSITION**.

2. FRONT CARRY FACING OUT POSITION (Child must face toward you until he/she can hold head upright!)

1. Attach the side wings with snaps in the center to make the base **NARROW**.

2. Place the carrier around your waist with the print toward your body.

3. Close and adjust waist belt tightly around your waist.

4. Place baby in the carrier. Support her with your arm.

5. Pull the carrier up and over the baby. Place the shoulder strap over your shoulder.

6. Switch your arms and reach behind for the end of the shoulder strap.

7. Attach buckles on side of the carrier. Pull on straps ends to adjust them tightly around your body. REPEAT STEP 6 & 7 with other shoulder strap.

8. Final position with headrest **DOWN & NARROW BASE**.

NOTES ABOUT FACING OUT POSITION:

Use the **NARROW BASE** for this position as it is more comfortable for you and the baby. While babies do enjoy the facing out position and the view of the world, it could be overwhelming after a while and babies may need to make eye contact with the caregiver. Some research also suggest, that **FACING IN** position is better for a proper spinal development and prolonged use of **FACING OUT** position is not recommended.

REGARDLESS THE POSITION, ALWAYS ENSURE BABY HAS A CLEAR AIRWAY TO BREATHE!!!

Babies also love to suck onto various parts of the baby carrier. While there maybe some color bleeding initially, this will diminish after first washing in cold water. Both the fabric and the fabric dyes are rigorously tested and safe for babies. The fabric is 100% organic cotton, dyes are water based.

WASHING INSTRUCTIONS: Machine wash with mild detergent on delicate cycle. Air dry carrier. Do not wash frequently. Do not use bleach. Spot clean as needed.

WARRANTY: Beco Baby Carrier warrants the product against defect in material and workmanship. We stand behind our products and will either repair or replace for free products purchased from an authorized retailer during the first year from the purchase. Proof of purchase necessary.

HOW TO OPEN THE THIRD LOCK BUCKLES

GEMINI baby carrier is equip with a very secure third lock buckles. Although harder to operate, these buckles dont open UNINTENDED. There is 2" buckle on waist belt and 1" buckles at sides.

TO OPEN:

Squeeze the sides of the buckle with one hand and push the button on buckle's top with your other hand. Pull the buckle parts apart.

WARNING - FALL HAZARD! KEEP AWAY FROM FIRE!
